PROFILE

I am a Full-Stack Laravel Developer with over 2.7 years of professional experience in developing secure, scalable, and high-performance web applications. After contributing significantly to HIPAA-compliant medical systems at Meta IT Services, I joined Sourcing Square in October 2024, where I continue to enhance both my backend and frontend development skills.

At Sourcing Square, I've led API integrations, worked extensively on backend logic, implemented SonarQube to improve code quality and maintainability, and contributed to building responsive and dynamic user interfaces using Next.js. My role involves full-stack ownership—writing clean, testable code, improving performance, and delivering features that drive real-world impact.

My journey has been driven by continuous learning, technical ownership, and a passion for building robust, user-focused applications within collaborative development teams.

WORK EXPERIENCE

Laravel and React Developer

Sourcing Square

October 2024 – Present

- Developed and maintained RESTful APIs using Laravel for scalable web applications.
- Used Next.js with Laravel APIs to build dynamic, user-friendly web applications.
- Worked on backend logic and data handling for dynamic dashboards and internal tools.
- Integrated SonarQube for automated code analysis and quality assurance.
- Participated in code reviews and agile sprints, collaborating with front-end and DevOps teams.
- Collaborated with React developers to deliver seamless, responsive user experiences.
- Quickly adapted to new tools and frameworks while delivering production-ready features.

Laravel Developer

Meta IT Service

August 2022 – April 2024

- Used React with Laravel to build dynamic, user-friendly web applications.
- Applied strong logic and OOP principles in Laravel for efficient, maintainable code.
- Collaborated on design integration for intuitive UI/UX across platforms.
- Contributed to team knowledge-sharing and peer learning initiatives.
- Developed secure authentication and subscription billing systems.
- Generated PDF and CSV reports for robust data analysis.
- Integrated third-party APIs including Foracre and Withings to streamline health data workflows.
- Automated billing workflows with Laravel to improve system efficiency.

Freelance Web Developer

Fiverr

March 2020 – February 2022

- Delivered custom web applications using CodeIgniter and Core PHP for global clients.
- Managed hosting, deployment, and maintenance of client websites.
- Communicated directly with clients to gather requirements and deliver tailored solutions.
