PROFILE

Meta IT Services Private Limited Lahore   Aug-2022 to April-2024

I am a skilled Laravel developer with 1.8 years of hands-on experience at Meta IT Services, where I specialized in developing and maintaining HIPAA-compliant medical websites. My work primarily involved backend development, ensuring that our web applications met the highest standards of security and performance. Throughout my tenure, I demonstrated a strong ability to manage complex projects, from initial research to deployment and code integration.

WORK EXPERIENCE

Key Responsibilities and Achievements:

- Research & Development:
  Conducted comprehensive research on project requirements to ensure that all tasks were executed efficiently and in compliance with HIPAA regulations.

- Task Flow Design:
  Developed detailed task flow diagrams, outlining how each component of the application would interact, which streamlined the development process and reduced potential errors.

- Backend Development:
  Leveraged Laravel to build robust, secure, and scalable backend systems for medical websites, focusing on maintaining HIPAA compliance and high performance.

- Version Control Management:
  Managed code versions using Git, regularly pushing updates and merging code with other developers to maintain a cohesive and collaborative development environment.

- Front-End Development:
  Created responsive and user-friendly front-end interfaces using jQuery, simple HTML, CSS, and Bootstrap, ensuring compatibility across various devices and browsers.

- Collaboration & Code Integration:
  Worked closely with other developers, participated in code reviews, and ensured that all code was well-documented and easily understandable for future maintenance.

- Security Compliance:
  Ensured that all development adhered to strict security standards, particularly in handling sensitive medical data, to maintain the integrity and confidentiality of user information.

- Continuous Improvement:
  Actively sought out new technologies and methodologies to improve the development process, focusing on increasing efficiency and maintaining high-quality code standards.

I am committed to delivering high-quality, secure web applications that meet the highest standards of performance and reliability. My experience in Laravel development, coupled with a passion for continuous learning and collaboration, equips me to be a valuable asset to any development team. I am eager to apply my skills in a dynamic environment where I can contribute to impactful projects and drive success for the organization.
